Subject: AW: Digital Coffee List – August availability

Hey everyone,

I discussed the topic internally, but unfortunately without management. We already have a plan for how to proceed with the payment, so please just present a concept for how you @Nils would implement it, with your process. This way, I can present the whole thing as an alternative and digital solution. Unfortunately, I don't have time for the meeting today, but this is my next step. @Alex and @Fares, we'll set a meeting in mid-September to get everything up and running.

Thank you.

BR,

Alex

Hi Nils,

Thank you for proposing the time. And nice to get to know you too from my side!

We wanted to ask if we can shift it to an earlier time slot. Would 12pm work for you? Earlier is also okay.

Otherwise we can try to make it fit from our side.

Thanks again and looking forward to hearing from you!

Best regards,
Fares and Alex

Hey Alex,

It's great to get to know you Alex and Fares.

As we are not on Holiday it's also totally fine for us to schedule a meeting in August. How would next Tuesday Afternoon suit you?

What about 14pm?

Happy to hear back from you,
Best
Nils

Hi Nils, hi Alex,

Apologies for missing your proposed time this morning, Nils – I was unexpectedly tied up.

Fares and I would be very happy to arrange another short call and learn more about your payment solution, particularly the available integration options, API and payment-confirmation flow. This would allow us to assess how it could fit Kaffeelisten. As Alex suggested, we can initially keep this as a technical discussion; once ITC1 confirms the scope, we can prepare the technical design.

We understand the August holiday period and are flexible, including in September. Please feel free to suggest a suitable time. I have added Fares back to the thread.

Thank you.

Best regards,
Alex & Fares

Hey Alex^2 ;)

Thanks Alex for the connection and very happy to get to know you Alex. I would be really happy to arrange a short call, how about tomorrow in the morning? If you like feel free to call me on 015904426960 to suggest any other dates,

Happy to hear back from you,
Best
Nils

Hi Alex, Hi Nils,

It would be great if you guys could discuss the topic in theory. I still need to talk about the whole digital payment thing internally. But that's going to take a while now because of the holiday season.

BR, Alex

Hi Alex, hi Nils,

Thank you for the introduction, and nice to meet you, Nils.

Yes, adding digital payment should be possible. Kaffeelisten already records consumption and supports monthly reports

and invoices; currently, payment happens separately and the status is marked manually. The most natural extension would be a payment link or QR code on each monthly invoice, with the status updated automatically once payment is confirmed.

We could integrate this ourselves using a provider such as Stripe. However, we would first like to understand Nils's solution and how it could connect to our existing process. The main question is whether ITC1 wants monthly invoice payments, automatic monthly collection, or payment for every individual purchase. From our side, monthly payment would fit the current application best.

Nils, perhaps we could arrange a short call to discuss this?

Thank you.

Best regards,
Alex

Hi Alex,

Would it be possible to add a digital payment option? We might also have a solution for this. It's best if you guys talk to see if it could be implemented. It is just a Idea.

On CC is Nils.

Thank you.

BR, Alex

Hi Alex,

I hope you are doing well.

Since our exams are now finished, I wanted to briefly follow up and ask about the current status from ITC1's side.

Could you let us know whether you would need anything from us as the next step?

Of course, if August is difficult due to the holiday period, we are also happy to continue this in September.

Thank you.

Best regards,
Alex Rudaev

Hi Alex,

thank you for the Info.

I will come back to you the next days because of the next steps.

Thank you.

Good morning Alexander,

Just a quick update from our side: our exams are nearly finished, and from August we will be available to continue working with ITC1. Fares can participate on-site, while I will be available remotely.

We have continued improving the digital coffee list and would be happy to give you and the team a short demonstration of its current state.

I have also attached our cost estimate for reference.

If ITC1 would like to proceed, perhaps we could create a Teams group and arrange a short meeting in August.

We would be very happy to continue the project with you.

Best regards,
Alex Rudaev & Fares Elbermawy
